DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2 and 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding claim 2, the phrase "with this" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "with this"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim 10 recites the limitation "according to one of the foregoing claims" in lines 1 and 2. There is insufficient antecedent basis for this limitation in the claim. The claim would be more definite if the recitation were, according to any one of the foregoing claims, or a specific range of claims as in previous claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim(s) 1, 3, 4, 6 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Easterly (4,192,457) in view of Mariani (4,971,025). Easterly discloses all of the limitations of the claim(s) except for heat transfer ribs. Mariani discloses the presence of heat transfer ribs. See 12. Hence, one skilled in the art would find it obvious to modify the system of Easterly to

Art Unit: 3749

include the heat transfer ribs of Mariani for the purpose of energy efficiency. See Easterly's fig. 2, **58** for the burner, **30** for the heat exchange means, **34** for first heat exchange region, **32** for second heat exchange region, **36** for exhaust gas conducting space, **52** for the flow duct means. Regarding claim 4, each segment of duct **102** constitutes a different region.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Easterly in view of Mariani. It is well-known in the art of HVAC to design a heat exchanger having multiple runs. Thus, it would have been obvious to one of ordinary skill in the art to incorporate the features of a heat exchanger having multiple runs into the system of Easterly in view of Mariani for the purpose of increased heat transfer.

Allowable Subject Matter

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The provided references are representative of the state of the art that is applicable to the applicant's invention.
